To whom it may concern,

I am delighted to recommend Junbo LUO for admission to Master's program in Environmental Intelligence at Macao Polytechnic University. As his mentor and a lecturer at College of Big Data and Intelligence Engineering of Southwest Forestry University, I had the privilege of knowing him over four years during his undergraduate studies. LUO Junbo is a standout student who exemplifies intellectual rigor, and I highly commend him for his analytical acumen and critical thinking, coupled with a disciplined approach to complex problem-solving, which highlights their capacity to thrive in demanding settings. He is a natural leader who can inspire and motivates others. His ability to manage projects efficiently and lead with clarity and purpose sets them apart.

What truly distinguishes Junbo LUO is his professional and goal-oriented approach to problem-solving. He excels in building positive relationships and communicating effectively, making him an asset in any collaborative environment. These qualities, combined with his drive and adaptability, make me confident he will succeed in his future academic and professional life. I strongly recommend Junbo LUO for any endeavours he wishes to undertake. I would be grateful this recommendation is favorably considered.

Yours sincerely,

WANG Xiaolin
