\$ lazyalloc

56733 free pages now!

proc just asked for 4kb memory with sbrk system call

56733 free pages After proc raised its request

Now, proc is going to write something to this newly space!
*a=3

After writing, 56732 free pages left!

Now proc is going to release a 4kb

After releasing, 56733 free pages left!
